

Product Brief: White-Label Vendor Onboarding & Field Monitoring App for Netles Ghana

Project Overview

Netles Ghana requires a white-labelled mobile application to support the onboarding and monitoring of *koko* vendors across Ghana. The application will be used by field promoters to register vendors, collect market intelligence, monitor visibility, and provide real-time reporting through a central dashboard.

The solution will be based on our existing application – **Engaged App**, customized with Netle Ghana branding.

Primary Users

- Field Promoters
- Field Supervisors
- Marketing Agency

Core Objectives

- Digitize vendor onboarding.
- Capture accurate field data with geolocation.
- Monitor brand visibility and competitor activities.
- Track promoter attendance and productivity.
- Provide Agency and Netle with real-time analytics and reports.

Mobile App Features

1. Vendor Onboarding

Promoters should be able to:

- Register new vendors
- Capture vendor details including:
 - Business Name
 - Vendor Name
 - Phone Number
 - GPS Location
 - Region
 - District
 - Community
 - Vendor Type
 - Years in Business

2. Photo Capture

Promoters should capture: - NB: Let's prevent photo uploads

- Vendor photo
- Shop photo
- Product display
- Shelf visibility
- Branding materials

Multiple photos should be supported.

3. Questionnaire

The app should support configurable questionnaires such as:

- Products currently sold
- Preferred supplier
- Daily sales volume
- Number of customers per day
- Interest in stocking Netles products
- Challenges faced
- Existing promotions
- Additional comments

Questionnaires should be editable from the admin portal without requiring app updates.

4. Footfall Recording

Promoters should record:

- Estimated customer footfall
- Peak shopping periods
- Traffic category (Low / Medium / High)
- Optional manual count

5. Visibility Monitoring

Capture:

- Netles product availability
- Product placement
- Shelf visibility
- Point-of-sale materials
- Promotional materials
- Stock levels
- Out-of-stock situations

6. Competitor Activity Monitoring

Capture competitor intelligence including:

- Competitor brands available
- Pricing
- Promotions
- Discounts
- New product launches
- Display quality
- Market observations

Photos should be attached where necessary.

7. Promoter Geolocation Attendance

The application should:

- GPS check-in
- GPS check-out
- Timestamp attendance
- Route history
- Verify promoter location
- Record total working hours

8. Offline Capability

Promoters should be able to:

- Work without internet
- Save data locally
- Automatically sync once internet becomes available

Admin Dashboard

Management should have access to a web dashboard showing:

Real-Time Dashboard

- Vendors onboarded
- Active promoters
- Daily visits
- Completed questionnaires
- Visibility scores
- Competitor reports
- Footfall statistics
- Attendance reports
- Regional performance
- Map view of all visits

Data Management

Administrators should be able to:

- Add/Edit/Delete users
- Assign promoters to territories
- Create questionnaires
- Export reports (Excel/PDF/CSV)
- Filter by date, region, promoter, or territory
- View uploaded images
- Monitor app usage

Reporting

Generate reports for:

- Daily activities
- Weekly summaries
- Monthly performance
- Vendor distribution
- Attendance
- Competitor intelligence
- Visibility compliance
- Footfall analysis

Notifications

- Missed check-ins
- Incomplete visits
- Sync failures
- New vendor registrations
- Supervisor alerts

Branding Requirements

The application should be fully white-labelled with:

- Netles Ghana logo – **Agency to advice**
- Brand colours – **Agency to advice**
- Custom login screen
- Netles branding throughout the application – **Agency to advice**

Expected Outcome

The solution should enable Promoters to efficiently onboard *koko* vendors nationwide, monitor field execution in real time, improve promoter accountability through geolocation, gather actionable market intelligence, and provide management with comprehensive dashboards for informed decision-making.
